DETAILED ACTION

Examiner's statement of reason of allowance

1. Claims 1-27 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a method of transferring data from a non-volatile memory to a working memory of an electronic data processing device, such as the electronic data processing device for blocking write attempts. Independent claims 1, 9 and 17, recites the uniquely distinct features of "copying security data from the non-volatile memory to the working memory, wherein the security data is to be write-protected; activating a blocking function for the security data in the working memory, wherein activating is triggered by the copying being made to the working memory; monitoring all communication with the working memory; and blocking all write attempts to the copied security data stored in the working memory according to the blocking function, wherein at least activating a blocking function, monitoring communication and blocking write attempts are performed independently of a central processing unit of the electronic data processing device, such that the central processing unit cannot manipulate the security data". The closest prior art, (Chuang (US 5632026)), discloses a conventional system and method to ensure that the copy of the firmware in cache RAM always matches the copy residing in the shadow memory and (Scott (US 2003/0023822)), discloses a method to control write operation access to various types of memories and also, (Ho (US 6510501)), discloses loading security data from non-volatile to volatile register.

Those prior arts fail to anticipate or render the above underlined limitations obvious for claims 1, 9 and 17.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
